Stay – Safe – Online

General tips:

- **Use strong, unique passwords** for each account (combine letters, numbers, and symbols).
- **Enable two-factor authentication (2FA)** on email, social media, and banking apps.
- **Avoid clicking unknown links** in SMS, emails, or WhatsApp messages.
- **Verify unknown callers**—don't trust people claiming to be from banks or customer care without proof.
- **Keep your apps and phone updated** to protect against security vulnerabilities

UPI / Financial Safety Tips:

- **Never share your UPI PIN or OTP** with anyone, even if they claim to be bank officials.
- **Always check payment requests carefully**—entering your UPI PIN means you are *sending* money, not receiving.
- **Avoid scanning unknown QR codes** sent by strangers or posted online.
